National Defense Authorization Act (NDAA) Compliance

Monitoreal Limited and its wholly owned subsidiary Monitoreal USA LLC (Monitoreal) are pleased to affirm that our entire product portfolio, which includes solutions marketed to the US government, Department of Defense (DoD) and associated contractors and affiliates, is fully compliant with Section 889 of the John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year 2019.

NDAA Section 889 prohibits federal agencies, their contractors and grant or loan recipients from procuring or using 'telecommunications and video surveillance services or equipment' including certain components or critical technology from several outlined Chinese manufacturers.

Monitoreal does not employ any SoC (System on Chip), or other components capable of processing software, from the banned Chinese companies. All Monitoreal products use NDAA-compliant chipsets, and most of our products use ARM, Intel, or NVIDIA chips.

Monitoreal is committed to ensuring the integrity and security of its supply chain and products. We conduct due diligence to verify that our components and manufacturing processes adhere to the highest standards and comply with all applicable regulations, including the NDAA.
